

## Getting your work published

Dissemination of research output is a crucial component of your research career. The peer-review process associated with publication is a great way to get feedback on your research-in-progress. Publishing and having your work peer-reviewed during your PhD will be looked on favourably during your PhD viva.

So how can you improve your chances of successfully navigating the peer-review process and getting published?

Through a mixture of practical exercises, theory and discussion this workshop aims to prepare participants for publication. We'll consider planning, pitching and practical writing issues. We'll explore formatting, appropriate use of language, correct mechanisms for citing, quoting and paraphrasing in order to avoid unintentional plagiarism. We'll consider different routes to publication and different audiences for our work. We'll consider publication within the larger context of the UK's Research Excellent Framework (REF).

This is a 3-hour interactive workshop for postgraduate researchers in the 1<sup>st</sup> or 2<sup>nd</sup> year of their PhD process. It can be delivered in person or online.

What others have said was useful about this course:

*The warmth of the delivery, the detailed knowledge, the mix of approaches.*  
*The importance of abstract and how to write it*  
*Tips on writing a good article & getting it accepted*  
*That the trainer had her own personal experiences of the subject matter as well as the knowledge*  
*All the information that the trainer provided and the interaction between students & trainer*
